Participation

The analysis after the event showed that we had around 470 different people logging in to Zoom over the three days. Like last year, a significant number of participants were watching the stream, either live during the session or later, via the recording. However, the increased number of parallel sessions led to a decreasing number of participants per session. On average we saw 30-40 participants logged into Zoom. Taking the numbers from Zoom and streaming/recording together we reached a number of participants comparable to last year or to what we would have expected from a physical meeting.

Participation
The analysis after the event showed that we had around 500 different people logging in to Zoom, but never more than 100 people per session at the same time. In addition, a significant number of participants were watching the stream, either live during the session or later on the recording. Taking the numbers from Zoom and streaming/recording together we reached a number of participants as would have had with a face-to-face meeting.

An example from day 1 in Studio The Hague: 266 unique participants logged into the Zoom room. In addition, 47 unique participants (peak number) followed sessions via live stream on YouTube. In total 269 unique participants watched the live stream or the recording of this Studio on this day. As of 27th August 2020 overall 393 people visited this recording.

It is notable that in a physical meeting the room capacity for workshops would not have accommodated as many participants as we could accommodate in the virtual meeting. However, there was quite a difference to the number of registration.
